

LEADING FOOD & BEVERAGE PLANT PROVIDER

From concept to completion, Stellar has the resources to design and implement all facets of your food & beverage plant. We have the knowledge of the food & beverage process that you need to get your plant designed, built, commissioned and into peak-operation. We are the only company to have design-built three roasting plants for Starbucks, designed the fastest entrée line for Heinz, and increased Pinnacle Food Group's production by 30 percent.

FOOD & BEVERAGE PROCESS ENGINEERING

Process and packaging lines are the source of a facility's profitability. Keeping them running at optimal capacity while maintaining food safety is crucial to short-term and long-range success. Stellar's process engineering team combines more than 300 years of experience in all key food segments for some of the world's leading brands to meet client objectives and maximize returns.

EXPERIENCE ACROSS ALL SEGMENTS

BAKERY

BEEF/PORK

BEVERAGE

DAIRY

POULTRY

READY-TO-EAT

SEAFOOD

COLD STORAGE

RETAIL GROCERY

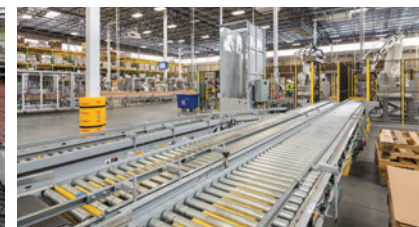

PRODUCE

OUR SERVICES:

- Planning
- A/E Design
- Preconstruction Management
- Construction Management
- Refrigeration
- Mechanical & Utility Services
- Building Envelope

Our team is well-versed in standards set forth by USDA & FDA, as well as regulations such as pasteurized milk ordinance (PMO)

WE SELF-PERFORM ALL CRITICAL COMPONENTS THAT IMPACT THE DESIGN AND CONSTRUCTION OF FOOD & BEVERAGE PROCESSING AND COLD STORAGE FACILITIES.

By self-performing these services, we maintain total control over project costs and timelines, while providing our valued clients with a single source of accountability.

LONG-TERM PARTNERS

Because our facilities meet the most stringent regulatory food safety standards and client expectations, 80% of our business in the food industry is repeat business.

DISTRIBUTION

Our integrated team specializes in low-cost, highly efficient warehouses that include dry, low-temperature, light industrial, and fully-automated facilities.

REFRIGERATION

By self-performing all industrial refrigeration and building envelope components, we ensure the highest level of vapor integrity and energy efficiency.

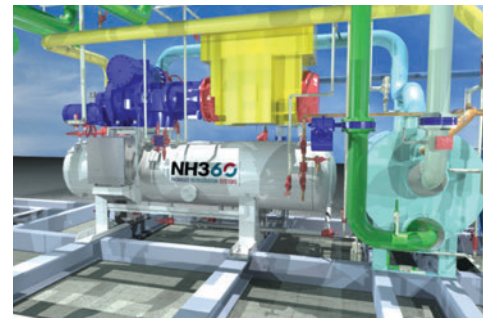

MEETING CLIENT NEEDS

From feasibility studies to logistics modeling, we provide a comprehensive list of self-performed services while maintaining total cost transparency.

SAVING ENERGY

Stellar's professional team has extensive knowledge in sustainable design and building practices.
