

# ALL-IN-ONE SOLUTIONS FOR BEVERAGE FACILITIES

Stellar is the only beverage production and processing team you need from concept to completion. We have the resources to design and implement (build, construct, manufacture, produce) all facets of your beverage production facility.

Running an efficient and productive operation is vital for every beverage processor. When you're formulating, bottling and distributing, you need a facility with process lines that consistently produce your beverages at the high quality consumers expect from your brand.

We work with established as well as up and coming manufacturers with any size operation. Our unique approach integrates Stellar's 35+ years of knowledge in industrial refrigeration for food and beverage processing plants and cold storage facilities.

As one of the nation's top food and beverage design and construction firms, Stellar implements the latest technology, innovative processing methods and infrastructure systems for beverage facilities including:

- Automation
- Blow molding / bottle making
- Bottling
- Carton filling
- Central utility plants
- Clean in place (CIP)
- Controls
- Dosing
- Filtering
- Industrial refrigeration
- Monitoring
- Packaging
- Palletizing/material handling
- Sanitation
- Storage vats and tanks
- Warehousing and Distribution Centers

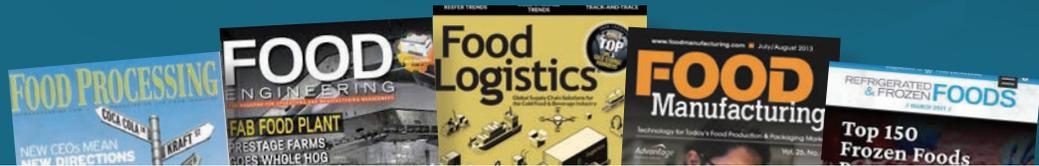

# FACILITY SERVICES

- Fully-integrated Design-Builder
- Site Evaluation, Selection and Acquisition
- Feasibility Studies, Master Planning and Budget Development
- Production, Packaging and Automation
- Industrial Engineering, Material Handling
- Architectural and Engineering Design
- Industrial Refrigeration Design, Installation and Maintenance
- Supply Chain Strategies

## EXPERTISE ACROSS THE BOARD

Published in more than **65** articles as industry experts in the last 3 years.

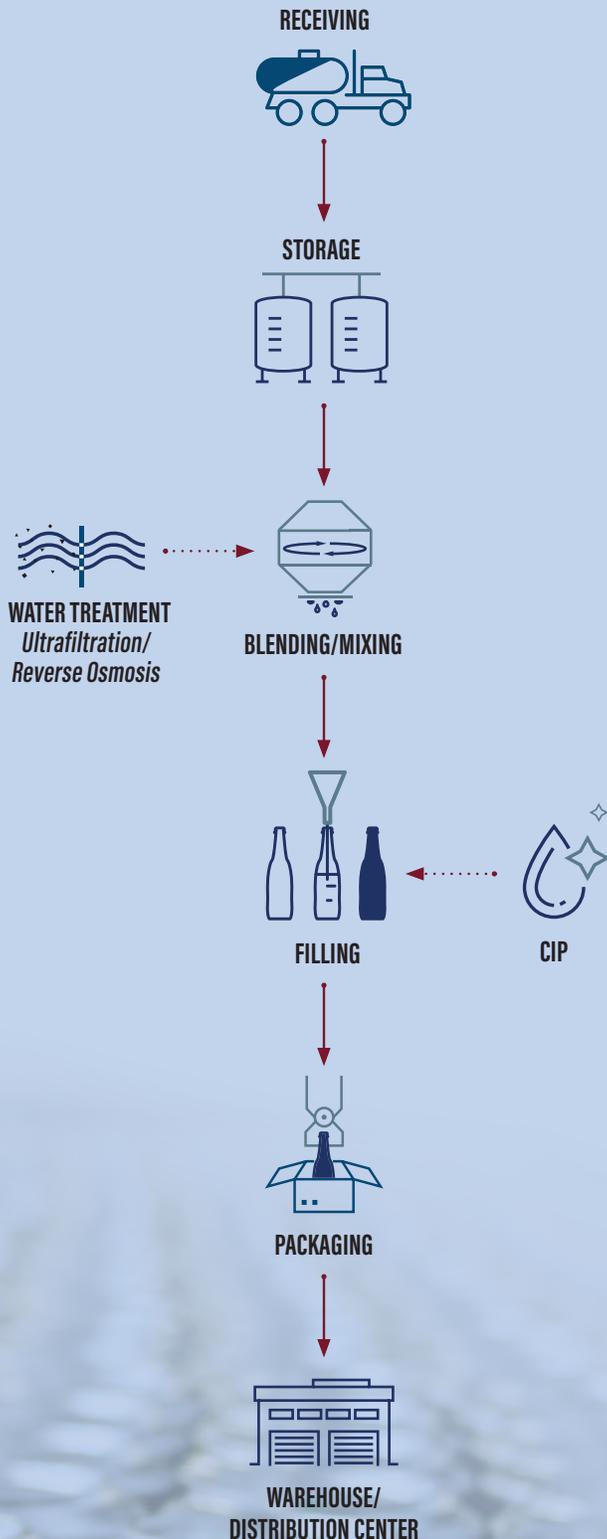

## STELLAR'S UNIQUE VALUE PROPOSITION

-  Speed to Market
-  Energy Optimization
-  Food & Beverage Safety Experts
-  Industrial Refrigeration
-  Beverage Manufacturing & Packaging
-  Logistics Strategy & Network Optimization
-  Material Storage & Handling Technology
-  Automated Storage & Retrieval System (ASRS) Experts
-  Refrigeration Technical Services, Parts and Compressors

***The thirst of every beverage processor must be quenched with design concepts tailored to their various applications***

# PROCESS

We can help design your process from receiving to final packaging.

# MARKET SEGMENTS

**HARD SELTZERS**

**ENERGY DRINKS**

**COFFEE**

**DAIRY**

**BEER**

**JUICE**

**KOMBUCHA/  
FERMENTED BEVERAGES**

**TEA**

**SOFT DRINKS**

## WHAT CAN STELLAR DO FOR YOU?

We understand that every beverage processor is different and each requires different design concepts to be applied to various applications.

We designed and built the world's largest dairy beverage plant and we stand as the only company that has designed and built two roasting plants for Starbucks, one of which was featured by *Food Engineering* as one of its top sustainable food plants. And our expertise in the beverage space shows we're the very best at meeting the modern beverage processors' unique needs — from sustainable solutions to increased production.

## PARTNERS FOR THE LONG TERM

Stellar has the knowledge of the beverage process that you need to get your plant designed, built, commissioned and into peak-operation. We have enjoyed many successful, long-standing partnerships with beverage industry leaders such as:

## BEVERAGE INDUSTRY EXPERTS

More than \$1 billion in projects is in the beverage industry, so you can trust that we will deliver a product that exceeds your expectations.

# \$1,000,000,000 IN PROJECTS
