

SPECIALISTS IN SOLVING PROBLEMS FAST

In today's competitive marketplace, downtime isn't an option.

Our highly responsive field crews have proven experience working within operational plants while maintaining the utmost quality. We know how to work efficiently on active campuses, greenfield projects and how to plan an expansion that doesn't shut down your production.

This client decided to add a flow-meter to their water supply after installation of domestic water piping. Stellar's solution to accommodate the request was a redesign of the piping that was engineered and installed in one day.

Stellar retrofitted this small existing space to accommodate a boiler addition including water treatment system. We updated the ventilation system to adhere to code compliance and added the equipment pads. Additional skid-mounted equipment was configured for installation in this same space. The new equipment provided support to the existing facility mechanical systems with seamless integration and virtually no loss to plant production output.

SAFE AND SANITARY PROCESS PIPING

We meet and exceed strict FDA sanitary guidelines regarding process piping for food and pharmaceutical production areas.

MECHANICAL & UTILITY

WHO WE ARE AND WHAT WE CAN DO FOR YOU

We are a team made up of full-time designers, developers, estimators, project managers and support personnel that self-performs procurement, installation, management and startup of your facility's Mechanical and Utility project requirements. We have a long and successful track record of diverse projects across a wide range of Industries. We continue to expand our expertise into new industries due to our excellent customer relationships, along with an outstanding job site safety record and focus on customer ROI. Our team provides our clients full confidence that a professional and profitable facility will be commissioned for owner occupancy. **Whether a greenfield project or enlargement of an existing facility, Stellar Mechanical and Utility, with its depth of Stellar disciplines, is the go to source for all of your company's growth and expansion plans.**

SELF-PERFORMANCE CAPABILITIES

-  Chilled Water Systems
-  Compressed Air
-  Domestic Water
-  HVAC Installation
-  Hydronic Piping
-  Natural Gas
-  Process Water Systems
-  Steam Systems
-  Systems Commissioning
-  Systems Start-up and Owner Training

SEAMLESS TRANSITION FROM CONCEPT TO COMPLETION

With decades of experience in all utilities, Stellar's team of experienced developers, estimators and installers possess more than 220 years of combined experience. We leverage that expertise to ensure mechanical components **work together to provide fast payback for our clients and reduce time lost by poor performance and downtime.** Our highly versatile and responsive team specializes in quick turnarounds and they are experienced in operational plants with strict sanitary guidelines.

EXTENSIVE INDUSTRY EXPERTISE

INDUSTRIAL

- Chemical Plants
- Nuclear Plants
- Power
- Pulp & Paper

MEDICAL

- Clinics / ASCs
- Medical Offices
- Long-term Care
- Pharmaceutical

COMMERCIAL

- Conference Centers
- Educational Facilities
- Food Service
- R&D Facilities

FOOD

- Bakery
- Beef/Pork
- Beverage
- Dairy
- Produce
- Poultry
- Ready-To-Eat
- Seafood

Stellar's Mission is to create long-term value for our customers by understanding their goals and delivering comprehensive, innovative solutions that exceed their expectations for quality and performance.

Our vision is to be the world's premier provider in the markets we serve, continually strengthened by the growth and contributions of our people and our ability to earn repeat business.
